'CMS Coding
for **COVID-19**
and Beyond'

Reserve your seat to **CMS Coding for COVID-19 and Beyond** on Jun 30, 2020 11:30 AM PDT. After registering, you will receive a confirmation email containing information about joining the webinar.

The CMS adoption of telehealth and virtual care services has created tremendous opportunities to increase access to care for patients, as well as revenue for providers and allied health professionals.

The CMS Coding for COVID-19 and Beyond Webinar will provide up-to-date information on the expansion of clinical practitioner categories, expansion of audio-only telehealth services, and CPT coding as well as modifiers will be discussed along with practical examples. This will include guidance on capturing accurate data related to symptoms and complications for proper coding to avoid delays and rejections of claims.

Join us for an informative session with Mary D. Gregory, RHIT, CCS, CDIP, CPC, CCS-P an expert and accomplished auditor for major hospital systems, outpatient facilities, and long-term care organizations over the past 25+ years. Mary is the past president of the North Carolina Health Information Management Association (NCHIMA) which is the component state organization (CSA) of the American Health Information Management Association (AHIMA). She has a lifelong passion for helping others develop their coding skills and has served as the 2013-2014 NCHIMA Coding Roundtable Chair, AHIMA ICD-10-CM/PCS trainer, and distance learning instructor for community colleges.

Mary is the Founder and President of Medical Administrative Solutions, a leading consulting firm she established in 2002. She will provide valuable insight into the accelerated changes in regulations and reimbursement brought on by the pandemic and CMS regulatory waivers. By the end of the webinar, participants will be able to:

1. Explain new opportunities and flexibility for telehealth and virtual services.
2. Apply the signs and symptoms of COVID-19 that apply to coding based on the services provided under the temporary emergency guidelines.
3. Demonstrate the importance of gaining the specific data required to avoid payment delays and rejections of claims.
4. Identify conditions attributed to COVID-19 and how to apply the modifier appropriately.
